## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Enk et al. in view of Thomas.

With respect to claim 7, Enk teaches all the limitations of the claim except for the heat and impact sensors. Thomas discloses a plurality of heat sensor 170 and impact sensor 160. It would have been obvious to one having ordinary skill in the art to have provided the fire extinguisher system of Enk with the heat and impact sensors as suggested by Thomas, since it would provide a versatile device.

With respect to claim 8, Enk teaches all the limitations of the claim except for the heat and impact sensors, which are adapted to, disposed in side panels and about a gas tank. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the fire extinguisher system of Thomas with the heat and impact sensors which are disposed in side panels and gas tank, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Art Unit: 3752

3. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Enk et al. in view of Thomas as applied to claims 7-8 above, and further in view of Brunsicke.

Enk in view of Thomas teach all the limitations of the claims except for a valve member, a pump and a mixing member. Brunsicke discloses a valve member 26, a pump 214 and a mixing member as stated in column 10, lines 23-31. It would have been obvious to one having ordinary skill in the art to have provided the fire extinguisher system of Enk and Thomas with a valve member, a pump and a mixing member as suggested by Brunsicke, since it would provide a safe and user friendly device.

***Allowable Subject Matter***

4. Claims 1-6 are allowed

***Response to Arguments***

5. Applicant's arguments filed April 03, 2001 have been fully considered but they are not persuasive.

6. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is

Art Unit: 3752

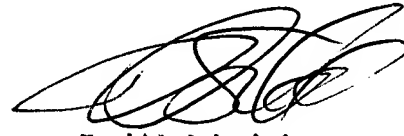

filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
